SUMMARY

A creative explorer with a diverse background and a passion for merging technology with ecology to make a positive impact on the world. Over 5 years of engineering experience. With a foundation in science, I thrive in the intersection of innovation and nature. My specialty lies in front-end engineering, but also handle full-stack development. In my free time, I enjoy freediving, exploring on motorcycles, and traveling the world, capturing adventures through the lens of an action camera.

EXPERIENCE

Front End Developer - Growth & Social Team

ESL FACEIT Group

01/2023 - 03/2024 London, UK

- Developed and maintained social features, including player profiles, content sharing, and friend connections, enhancing user engagement and interaction.
- Assisted in migrating the app to a new tech stack by sunsetting legacy features and developing new components aligned with modernization efforts.
- Implemented UI components to support community events and feature updates, driving user participation and retention.
- Collaborated with the marketing team to create appealing interfaces for promotional campaigns and new user acquisition.
- Worked closely with cross-functional teams to ensure a seamless transition and integration of new technologies while maintaining a high-quality user experience.
- Conducted user research and A/B testing to optimize the user interface and improve user satisfaction.

Front End Developer - CSGOHUB

ESL Gaming GmbH

01/2022 - 01/2023 Cologne, DE

- Worked on the team responsible for the full development cycle of CSGO HUB platform, focusing on enhancing user experience and performance.
- Collaborated closely with designers to modernize the platform's look and improve load times significantly. Conducting A/B tests to optimize user interface and engagement.
- Worked closely with backend teams to ensure seamless integration of front-end features and performance enhancements.
- Supported marketing and SEO teams to increase site traffic and exposure for campaigns.
- Optimized existing codebase, ensuring platform stability and performance through ongoing maintenance and support, addressing user feedback.

Full Stack Developer

Aptoide

08/2019 - 11/2021 Lisbon, PT

- Worked on the team responsible for web development of Aptoide's main platform and corporate sites, serving millions of monthly users.
- Modernized of the entire website collection from AngularJS to React, enhancing performance and user experience.
- Collaborated closely with designers, backend, SEO, and marketing teams to ensure alignment of development efforts with business objectives.
- Mentored two junior developers, providing guidance and support to enhance their skills and productivity. Implemented an onboarding system that significantly reduced onboarding time for new team members.
- Conducted A/B testing and created campaigns to optimize user engagement and drive business goals including passing 100K € in ad revenue.
